

Isaí Céspedes

Frontend Engineer · TypeScript & React Specialist

cespedesisai88@gmail.com · linkedin.com/in/isaicespedes · github.com/Lordkaito · lordkaito.dev

Frontend-leaning Full Stack Engineer with 4+ years of experience delivering production TypeScript and React/Next.js applications for international SaaS products. Specialized in frontend architecture, developer experience, and AI-augmented engineering workflows — leveraging specification-driven development, multi-agent implementation and review processes, and automated quality controls to accelerate delivery while maintaining high standards of code quality and maintainability. Experienced working in async-first distributed teams across US and European time zones.

EXPERIENCE

Full Stack Software Developer · Stack Builders

Jan 2024 – Jun 2026

Consulting firm delivering SaaS and B2B products for international clients across the US, UK, and Spain.

- Architected and led a full frontend migration off a legacy CMS, cutting page load time 35%.
- Eliminated 4,000+ TypeScript errors in a large production codebase through stricter typing standards, reducing runtime bugs.
- Automated a 200+ page markdown migration pipeline with custom syntax validation, saving 50+ engineering hours per project.
- Established frontend standards (ESLint, Biome, pre-commit hooks, PR templates) across projects, cutting onboarding ~50% and time-to-first-delivery ~70%.
- Built specification-driven, multi-agent development and review workflows, speeding delivery while keeping strict TypeScript, CI and test-coverage standards.

Full Stack Software Developer · Pylon Data

Oct 2022 – Feb 2023

Solar energy management platform serving electricity providers across the United States.

- Built and shipped client-facing features for a solar estimation and reporting platform, improving reporting accuracy for utility providers.
- Delivered custom client solutions that directly affected the reliability of solar estimates used by real infrastructure operators.

Peer Technical Mentor · Microverse

Jan 2022 – Oct 2023

Hired as staff while enrolled, to support early-stage developers.

- Mentored 200+ junior developers through code reviews, debugging sessions and best practices; several moved into full-time development roles.
- Kept review quality consistent across an international cohort, with clear, actionable feedback that sped up mentee progress.

SKILLS

Core: TypeScript, JavaScript (ES2022+), HTML5, CSS3

Frontend: React, Next.js (App Router & Pages), Zustand, Redux, Tailwind CSS, Lit, SSR/SSG, Component Architecture, Frontend Architecture, Web vitals, Responsive Design

Backend: Node.js, GraphQL, REST APIs, Ruby on Rails, PostgreSQL, MySQL, PHP, API integration, System Design

AI-Augmented Engineering: Specification-Driven Development, Multi-Agent Development Workflows, AI-Assisted Code Review & Security Validation, Automated Documentation & Knowledge Management, Structured Project Context (Obsidian), Claude Code, GitHub Copilot, Gemini, Codex

Testing & QA: Jest, React Testing Library, Playwright, Type-Safe Development, Test-Driven Development (TDD)

DX & Tooling: ESLint, Biome, Prettier, Pre-commit Hooks, Git, GitHub, CI/CD, Automation Scripting, Agile Methodology

Languages: Spanish (native), English (professional)
